

COVID-19 Open Data (Mexico) – Variable Dictionary

English translation of variable names, descriptions, formats/sources, and classification catalogs (source files: 201128_Descriptores_.xlsx and 201128_Catalogos.xlsx)

No.	Variable Name	Variable Description	Format / Source
1	FECHA_ACTUALIZACION	The database is updated daily; this variable identifies the date of the last update.	YYYY-MM-DD
2	ID_REGISTRO	Case identification number.	TEXT
3	ORIGEN	Sentinel surveillance is carried out through the system of respiratory disease sentinel health units (USMER). USMER includes primary, secondary, and tertiary care medical units; tertiary units that broaden the epidemiological picture (e.g., pulmonology, infectious disease, or pediatrics specialties) also participate as USMER. (Categories in attached catalog).	CATALOG: ORIGEN
4	SECTOR	Identifies the type of institution within the National Health System that provided care.	CATALOG: SECTOR
5	ENTIDAD_UM	Identifies the state where the medical unit that provided care is located.	CATALOG: ENTIDADES (States)
6	SEXO	Identifies the patient's sex.	CATALOG: SEXO
7	ENTIDAD_NAC	Identifies the patient's state of birth.	CATALOG: ENTIDADES (States)
8	ENTIDAD_RES	Identifies the patient's state of residence.	CATALOG: ENTIDADES (States)
9	MUNICIPIO_RES	Identifies the patient's municipality of residence.	CATALOG: MUNICIPIOS
10	TIPO_PACIENTE	Identifies the type of care the patient received at the unit: outpatient (returned home) or hospitalized (admitted).	CATALOG: TIPO_PACIENTE
11	FECHA_INGRESO	Identifies the date the patient was admitted to the care unit.	YYYY-MM-DD
12	FECHA_SINTOMAS	Identifies the date the patient's symptoms began.	YYYY-MM-DD
13	FECHA_DEF	Identifies the date the patient died.	YYYY-MM-DD
14	INTUBADO	Identifies whether the patient required intubation.	CATALOG: SI_NO (Yes/No)
15	NEUMONIA	Identifies whether the patient was diagnosed with pneumonia.	CATALOG: SI_NO (Yes/No)
16	EDAD	Identifies the patient's age.	NUMERIC, IN YEARS
17	NACIONALIDAD	Identifies whether the patient is Mexican or foreign.	CATALOG: NACIONALIDAD
18	EMBARAZO	Identifies whether the patient is pregnant.	CATALOG: SI_NO (Yes/No)
19	HABLA LENGUA_INDIG	Identifies whether the patient speaks an indigenous language.	CATALOG: SI_NO (Yes/No)
20	INDIGENA	Identifies whether the patient self-identifies as an indigenous person.	CATALOG: SI_NO (Yes/No)
21	DIABETES	Identifies whether the patient has a diabetes diagnosis.	CATALOG: SI_NO (Yes/No)
22	EPOC	Identifies whether the patient has a COPD diagnosis.	CATALOG: SI_NO (Yes/No)
23	ASMA	Identifies whether the patient has an asthma diagnosis.	CATALOG: SI_NO (Yes/No)

No.	Variable Name	Variable Description	Format / Source
24	INMUSUPR	Identifies whether the patient is immunosuppressed.	CATALOG: SI_NO (Yes/No)
25	HIPERTENSION	Identifies whether the patient has a hypertension diagnosis.	CATALOG: SI_NO (Yes/No)
26	OTRAS_COM	Identifies whether the patient has a diagnosis of other diseases.	CATALOG: SI_NO (Yes/No)
27	CARDIOVASCULAR	Identifies whether the patient has a diagnosis of cardiovascular disease.	CATALOG: SI_NO (Yes/No)
28	OBESIDAD	Identifies whether the patient has an obesity diagnosis.	CATALOG: SI_NO (Yes/No)
29	RENAL_CRONICA	Identifies whether the patient has a diagnosis of chronic kidney disease.	CATALOG: SI_NO (Yes/No)
30	TABAQUISMO	Identifies whether the patient has a smoking habit.	CATALOG: SI_NO (Yes/No)
31	OTRO_CASO	Identifies whether the patient had contact with another case diagnosed with SARS-CoV-2.	CATALOG: SI_NO (Yes/No)
32	TOMA_MUESTRA_LAB	Identifies whether a laboratory sample was taken from the patient.	CATALOG: SI_NO (Yes/No)
33	RESULTADO_LAB	Identifies the result of the sample analysis as reported by the laboratory of the National Network of Epidemiological Surveillance Laboratories (InDRE, LESP, and LAVE) and private laboratories accredited by InDRE whose results are recorded in SISVER. (Diagnostic result catalog attached).	CATALOG: RESULTADO_LAB
34	TOMA_MUESTRA_ANTIGENO	Identifies whether an antigen sample for SARS-CoV-2 was taken from the patient.	CATALOG: SI_NO (Yes/No)
35	RESULTADO_ANTIGENO	Identifies the result of the antigen sample taken from the patient.	CATALOG: RESULTADO_ANTIGENO
36	CLASIFICACION_FINAL	Identifies whether the patient is a COVID-19 case according to the "CLASIFICACION_FINAL" catalog.	CATALOG: CLASIFICACION_FINAL
37	MIGRANTE	Identifies whether the patient is a migrant.	CATALOG: SI_NO (Yes/No)
38	PAIS_NACIONALIDAD	Identifies the patient's nationality.	TEXT, 99 = UNKNOWN
39	PAIS_ORIGEN	Identifies the country the patient departed from en route to Mexico.	TEXT, 97 = NOT APPLICABLE
40	UCI	Identifies whether the patient required admission to an Intensive Care Unit.	CATALOG: SI_NO (Yes/No)

Note: Variables marked "CATALOG: ..." reference coded lookup tables (e.g. state, municipality, yes/no, lab result) provided in the accompanying catalog file (201128_Catalogos.xlsx). Dates follow the ISO format YYYY-MM-DD. The classification values for each catalog are listed on the following pages.

Classification Catalogs

English translation of the coded classification values referenced by the variables above. The catalogs ENTIDADES (32 federal states) and MUNICIPIOS (2,400+ municipalities) are place-name lists rather than classifications and are omitted here for brevity; they remain in their original Spanish form in 201128_Catalogos.xlsx, as place names are not translated.

ORIGEN (Surveillance Origin)

Code	English Classification
1	USMER
2	OUTSIDE USMER
99	NOT SPECIFIED

SECTOR (Healthcare Sector / Institution)

Code	English Classification
1	RED CROSS
2	DIF (Family Welfare Agency)
3	STATE
4	IMSS (Social Security Institute)
5	IMSS-BIENESTAR (Welfare Program)
6	ISSSTE (Federal Employees' Social Security)
7	MUNICIPAL
8	PEMEX (State Oil Company)
9	PRIVATE
10	SEDENA (Ministry of National Defense)
11	SEMAR (Ministry of the Navy)
12	SSA (Ministry of Health)
13	UNIVERSITY
99	NOT SPECIFIED

SEXO (Sex)

Code	English Classification
1	FEMALE
2	MALE
99	NOT SPECIFIED

TIPO_PACIENTE (Patient Type)

Code	English Classification
1	OUTPATIENT

Code	English Classification
2	HOSPITALIZED
99	NOT SPECIFIED

SI_NO (Yes / No) — used by most binary variables

Code	English Classification
1	YES
2	NO
97	NOT APPLICABLE
98	UNKNOWN
99	NOT SPECIFIED

NACIONALIDAD (Nationality)

Code	English Classification
1	MEXICAN
2	FOREIGN
99	NOT SPECIFIED

RESULTADO_LAB (Laboratory Result)

Code	English Classification
1	POSITIVE FOR SARS-CoV-2
2	NOT POSITIVE FOR SARS-CoV-2
3	RESULT PENDING
4	RESULT NOT ADEQUATE/INVALID
97	NOT APPLICABLE (case with no sample taken)

RESULTADO_ANTIGENO (Antigen Test Result)

Code	English Classification
1	POSITIVE FOR SARS-CoV-2
2	NEGATIVE FOR SARS-CoV-2
97	NOT APPLICABLE (case with no sample taken)

CLASIFICACION_FINAL (Final Case Classification)

Code	English Classification
1	COVID-19 CASE CONFIRMED BY EPIDEMIOLOGICAL/CLINICAL ASSOCIATION — applies when the case reported contact with a confirmed COVID-19 case (registered in SISVER) and either no sample was taken or the sample was invalid.

Code	English Classification
2	COVID-19 CASE CONFIRMED BY REVIEW COMMITTEE — applies only to deaths where no sample was taken, or a sample was taken but was invalid.
3	CONFIRMED SARS-CoV-2 CASE — applies when the case has a laboratory or antigen test that came back positive for SARS-CoV-2, regardless of epidemiological association.
4	INVALID BY LABORATORY — applies when the case has no clinical-epidemiological association or committee ruling, and the laboratory sample taken was invalid.
5	NOT PROCESSED BY LABORATORY — applies when the case has no clinical-epidemiological association or committee ruling, and the laboratory sample taken was never processed.
6	SUSPECTED CASE — applies when the case has no clinical-epidemiological association or committee ruling, and either no sample was taken, or a sample was taken and the result is still pending.
7	NEGATIVE FOR SARS-CoV-2 — applies when (1) a laboratory sample came back negative for SARS-CoV-2 or positive for another respiratory virus (Influenza, RSV, Bocavirus, etc.), regardless of epidemiological association or committee ruling, or (2) an antigen sample came back negative and no laboratory sample, epidemiological association, or committee ruling confirmed the case.
